Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants' representative pointed out that the present invention is directed toward national security whereas the cited prior art is suited for supply chain management. Both Examiner and applicants' representative agreed that the present claims were too broad to exclude the prior art references. Applicants' representative also pointed out that the door sensor taught in the Breed reference was essentially an on/off switch. A proposed amendment to the claims to overcome the claims was presented to Examiner. Examiner acknowledged that the proposed amendment appeared to overcome the Breed reference but stated that additional search and consideration of the proposed amendment would have to be done before a decision could be made on patentability.
